

WAREHOUSE UNIT COOLER

Walk-Ins: Medium to Large Cooler and Freezer Applications

Warehouse Unit Coolers are designed exclusively for applications 3,000 sq. ft. and larger and fall outside of the July 2020 Department of Energy Annual Walk-in Energy Factor (AWEF) regulations.

Air Defrost

34,500 to 282,500 BTUH

Electric Defrost

36,400 to 246,100 BTUH

Hot Gas Defrost

36,400 to 246,100 BTUH

FEATURES

Russell's Warehouse Unit Coolers are the ideal evaporator solution for large walk-in coolers and freezers. Designed with efficiency, performance and service in mind, the Warehouse Unit Cooler line is optimized to cover Cold Storage applications in the most effective way. The Warehouse units feature rail-mount three-phase motors with standard or high static pressure prop fan blades. All units are circuited for multiple refrigerants and feature optimized circuit patterns to maximize performance. Warehouse Unit Coolers have several enhanced service features including rail-mount motors, new high efficiency fan and venturi designs, enhanced surface coil tubing, easily removable fan guards and modular fan panels, face mount defrost heaters, hinged drain pans and shipping pallets designed to facilitate easy installation.

WAREHOUSE UNIT COOLERS ARE DESIGNED EXCLUSIVELY FOR APPLICATIONS 3,000 SQ. FT. AND LARGER.

SIZES

There are a wide array of sizes to match your specific application requirements ranging from 34,500 to 282,500 BTUH at a 10°TD. Models are available with air flow spanning a range of 6,875 to 27,500 CFM.

HOUSING

Each unit is constructed with a rust-free, heavy gauge, textured, aluminum housing which is light weight yet extremely durable. Models feature hinged drain pans to allow for convenient servicing and maintenance. Pre-drilled hanger holes are provided on all units for fast installation..

COIL

Seamless copper tubes are staggered and mechanically expanded into heavy gauge corrugated aluminum fins to assure maximum heat transfer. Die formed fin collars are provided for accurate fin spacing. Heavy gauge hangers are fastened directly to the tube sheet of the coil to provide high structural strength. Electric Defrost and Hot Gas Defrost Models are available in both 6 FPI and 4 FPI.

MOTORS

Models are offered with three-phase motors with standard or high static pressure prop fan blades. If you require a High-Static fan blade in an application above freezing, please contact factory.

FANS & FAN GUARDS

Powerful heavy-duty aluminum fans are individually balanced to provide vibration free operation. Standard heavy-gauge wire fan guards are UL/cUL-approved epoxy coated for corrosion resistance. High static pressure prop fan blades are also available. Air throw for Warehouse Unit Coolers is 120 ft. with standard fan.

REFRIGERANTS

Heavy Duty Unit Coolers are optimized for multiple refrigerants including R404A, R407A, R448A, R449A and R744 DX (CO2). Please specify system refrigerant requirements when ordering. A separate compartment is provided for all refrigerant connections which allows ample room for internal mounting of expansion valves.

ELECTRIC DEFROST - LOW TEMP

Low Temperature Electric Defrost Models (RW6E or RW4E) are designed for use in freezers between +10F and -30F room temperatures. Defrost heaters are mounted on the air intake side of the unit for optimal performance and easy maintenance. A lower heater is installed inside the drain pan for fast, reliable drainage. Adjustable defrost termination, fan delay and heater safety controls are factory mounted for optimum performance of each control function.

ELECTRIC DEFROST - MEDIUM TEMP

Medium Temperature Electric Defrost Models (RW6D OR RW4D) are designed for use in coolers between +11F and +35 room temperatures. Defrost heaters are mounted on the air intake side of the unit for optimal performance and easy maintenance. A lower heater is installed inside the drain pan for fast, reliable drainage. Adjustable defrost termination, fan delay and heater safety controls are factory mounted for optimum performance of each control function.

HOT GAS DEFROST

There are two types of Hot Gas Defrost models available: 3-pipe Hot Gas models (RW*H or RW*K) and 2-pipe Hot Gas Reverse Cycle units (RW*G or RW*L). Hot Gas Defrost models are designed for use in coolers and freezers between 35°F and -30°F. Models are offered with electric or hot gas drain pans. All units include adjustable defrost termination and fan delay controls which are factory mounted for optimum performance of each control function. Refer to the current Russell Technical Bulletin for piping. Reverse Cycle units can also be used for Alternating Evaporator Systems.

ELECTRICAL

Available in 208/230V/12, 208-230V/3, 460V/1 or 460/3. A large compartment is supplied for all electrical components and is easily accessible by removing the end panel. All models are UL and cUL listed.

AIR DEFROST

Air Defrost models (RW6A) are designed for use in coolers at +35°F and warmer.

OPTIONAL FEATURES

- EcoNet® Enabled Controller¹ (factory-installed)
- EcoNet® Command Center (loose)
- Reverse Connections
- Thermostat - Mechanical or Electric (mounted or loose)
- Thermostatic Expansion Valve (mounted or loose)
- Electronic Expansion Valve (mounted or loose)
- Liquid Line Solenoid Valve (mounted or loose)
- Insulated Drain Pan
- Painted Cabinet (White or Black Russproof)
- Stainless Steel Cabinet
- Coated Coil (Bronz-Glow, or Electrofin®)
- Heat Exchanger (loose)

NOTES

1. EcoNet Control Package includes: EEV, suction pressure transducer, suction entering air coil temp. thermistors, thru-the-door disconnect switch, local on-board two-row backlit LCD display and push-button adjustments. (Controller replaces TXV, liquid line solenoid valve, room thermostat, defrost termination, fan delay, and time clock.)

HIGHLIGHTED FEATURES AND OPTIONS

FANS AND HOUSING

- 30" heavy duty aluminum fans are balanced for vibration-free operation
- High efficiency deep draw venturi provide optimal air flow
- Hinged panels that can easily be removed
- NSF approved

COILS AND DEFROST HEATERS

- Available in 4 or 6 fins per inch (FPI)
- Electric defrost heaters are mounted on the air intake coil face to provide easy service access
- The drain pan heater is affixed to the drain pan and is easily accessed for service or cleaning

ELECTRICAL AND PIPING

- End panels slide out for easy service from the front or sides of the unit
- Ample room in electrical and piping compartments for easy access

ECONET ENABLED UNIT COOLERS (OPTIONAL)

- Developed in conjunction with Rheem Manufacturing specifically for walk-in coolers and freezers – it builds on the reliability and efficiency of Rheem's EcoNet technology.
- Saves energy in refrigeration systems through precise superheat and space temperature control, fan cycling, and controlling how often the system goes into defrost based on compressor runtime.
- Eliminates unnecessary defrosts
 - Maximizes energy efficiency with less compressor runtime
 - Reduces fan speed to 50% during off cycle for energy savings
- Can be used with a condensing unit in single and multiple evaporator installations as a group.
- Optional **EcoNet Command Center** with intuitive graphical interface controls up to 32 devices (including the Command Center) through one display, provides continuous communication between system components, and the remote mount display allows for EcoNet Enabled Unit Coolers to be programmed, monitored and troubleshoot outside of the space being cooled.

SUPPORTS ARE BOLTED TO PALLET AND UNIT COOLER FOR PRODUCT SAFETY AND QUICKER INSTALLATION

NOTES:

1. Capacity Correction for Low Temp Electric and Hot Gas Defrost

S.S.T. (Dew)	0°F	-10°F	-20°F	-30°F	-40°F
Multiply Capacity by:	1.075	1.0375	1	0.9625	0.925

2. EcoNet Enabled Units are not powered by Condensing Unit so Defrost Heaters are incorporated into shown MCA/MOPD.

* Each asterisk represents a variable character based on voltage ordered. See page 5 for nomenclature.

[^] R407A, R448A and R449A are rated at dew point temperature. Use R407A capacity ratings for R407C and R407F.

High static models are capable of .35" water column external static pressure for duct or air flow accessories. Models with high static fan blades should not be used without the presence of external static pressure.

Warehouse models are designed exclusively for use in walk-in coolers and freezers 3,000 sq. ft and larger and fall outside of the July 2020 Department of Energy Annual Walk-in Energy Factor (AWEF) regulations.

NOTES:
 The distributor lines are 1/4" tube & 21" long.
 * Each asterisk represents a variable character based on voltage ordered. See page 5 for nomenclature.
[^] TXV selections are based on +25°F suction temp., 8°F to 12°F evaporator TD. Contact factory for operating conditions outside of this range.
[†] SBFDE ODE, and EBSDE expansion valves are compatible with expansion valves are compatible with R407A, R448A and R449A/B.
 For other valves, follow manufacturers selection guidelines.
 Base models (no factory-mounted components) include nozzles sized for 100°F liquid shipped loose.

Russell's Warehouse Unit Cooler can be used in combination with Next-Gen II Condensing Units to provide complete refrigeration solutions for medium and large walk-ins 3,000 sq. ft. and larger.

Shipping Information - All Models

No. of Fans	Shipping Dimensions (Inches)			Approx. Unit Wt. (Lbs.)
	L	W	H	
1	69	42	66	480
2	109	42	66	750
3	146	42	66	1,030
4	189	42	66	1,360

NOTES:

- * Each asterisk represents a variable character based on voltage ordered. See page 5 for nomenclature.
- [^] For units with mounted TXV components. See Nozzle/TXV table for distributor connection size when TXV is field installed.
- 1. For dimensional distance between hanger slots, consult model's corresponding dimension drawing. Hanger slots are 1" deep x 1/2" wide.
- 2. Drain is 1-1/4" NPT for all models.

TYPICAL APPLICATIONS:

Medium to Large Warehouses

Cold Storage Warehouses

Walk-in Coolers and Freezers

NOTES:
 * Each asterisk represents a variable character based on voltage ordered. See page 5 for nomenclature.
[^] For units with mounted TXV components. See Nozzle/ TXV table for distributor connection size when TXV is field installed.
 1. For dimensional distance between hanger slots, consult model's corresponding dimension drawing. Hanger slots are 1" deep x 1/2" wide.
 2. Drain is 1-1/4" NPT for all models.
 3. For shipping dimensions and weights, see Shipping Information table on page 17.
