PACKAGED REFRIGERATION SYSTEM

A single unit that houses everything
needed to cool a space

PACKAGED REFRIGERATION SYSTEM

This DOE AWEF rated self-contained system comes in two sizes that satisfy low and medium temperature refrigeration needs and is ideal for holding applications. Once installed - either indoors or outside - setting up the unit is practically as easy as plugging it in. The system is EcoNet Enabled with Electronic Expansion Valve and can be operated with an optional Command Center from anywhere.

The Packaged Refrigeration System comes in 8 Scroll Compressor models & 2 Hermetic Compressor models. Our equipment is designed with the future in mind. We strive to incorporate sustainable solutions along with options and functionality that satisfy regulatory compliance. The Packaged Refrigeration System is easy to install and service. It's everything you need in one box.

OPTIONAL ECONET COMMAND CENTER

Control Board

Using Rheem's SMART technology, the EcoNet Command Center can program, monitor, and troubleshoot equipment outside of the space being cooled. The Packaged Refrigeration System is already assembled with the EcoNet Control Board which analyzes and optimizes defrost cycles to provide a consistent temperature and extend the life of the unit.

By adding the optional Command Center, a Technician or Building Manager never has to step foot into the freezer in order to control temperature or maintain the equipment. Control up to 32 devices (including the Command Center) on one touchscreen.

Command Center

BTUH

Medium Temperature // 4,790 to 15,830

Low Temperature // 3,790 to 15,130

HIGHLIGHTS

- EcoNet Enabled to maximize energy efficiency with less compressor runtime
- EcoNet optimizes defrost by using adaptive defrost or managing compressor runtime
- EcoNet improves product quality by reducing temperature fluctuation
- Available outdoor options include a Roof Kit and Hail Guard
- Factory pre-charged with R-448A
- One electrical wiring point with the ability to add a plug on select models
- Standard boil-out pan with an option to mount a drain line
- Lift-off panels & large electrical box

NOTES

- If the Medium Temperature model has a numerical value in the table above, the following statement applies: "This refrigeration system is designed and certified for use in walk-in cooler applications
- If the Low Temperature model has a numerical value in the table above, the following statement applies: "This refrigeration system is designed and certified for use in walk-in freezer applications.
