R-Series Next-Gen MiniCon

1/2 TO 6 HP MULTI-REFRIGERANT AIR COOLED CONDENSING UNITS

1/2 TO 6 HP

The Next Generation of MiniCons are Here!

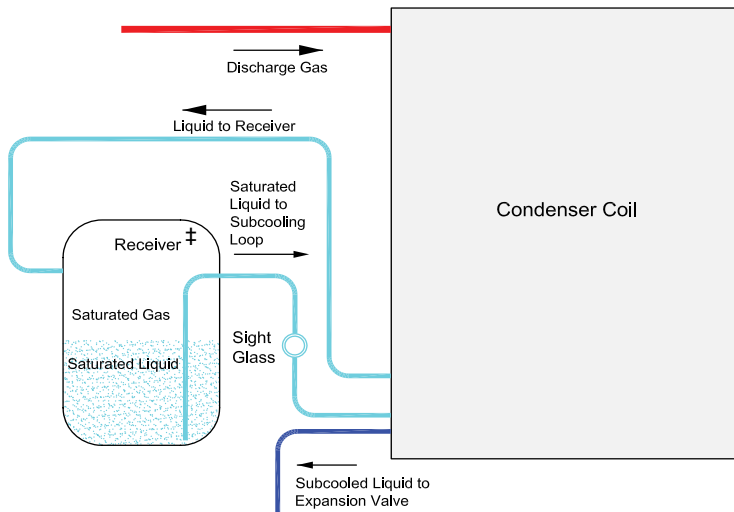

Russell's Next-Gen MiniCon R-Series ½ through 6 HP condensing units are engineered with an exciting new design that provides increased efficiency, more standard features, easier serviceability, and more catalogued options.

Next-Gen MiniCons are ideally suited for use in a variety of commercial applications such as cafeterias, convenience stores, restaurants and fast food outlets while providing the versatility to excel in a full array of other applications. These new R-Series units provide a winning combination of high quality, increased flexibility and greatly improved efficiency for even lower long-term operating costs.

The small profile product line is designed to utilize R404A or other low GWP refrigerants R407A, R407C, R448A and R449A. Units are available with low-cost hermetic or efficient and quiet scroll compressors. The standard Next-Gen R-Series is rated for operation in ambient air temperatures up to 110°F.

Integral Subcooling Circuit

All Next-Gen MiniCon units feature an integral subcooling circuit that allows saturated liquid to flow from the receiver to the condenser where the refrigerant is subcooled by ambient air. This provides an average of 3 to 5°F of subcooling for higher efficiency while assuring optimal expansion device operation.

‡ Sierra models include a receiver section within the condenser and do not have a separate receiver tank.

NEXT-GEN MINICON CONDENSING UNITS

Standard Features

- Low-cost Hermetic or quiet and efficient Scroll compressor
- All-weather - Galvanized steel painted housing
- Generously sized high efficiency condenser, enhanced copper tubes/aluminum fins
- Integral Liquid Subcooling Circuit provides subcooled liquid to the expansion device
- Base mounted shut-off valves placed external to cabinet for easy access
- Liquid line kit with filter/drier and sight glass with moisture indicator
- Suction line piping
- Larger electrical panel with hinged/removable door
- Color coded point-to-point wiring
- Crankcase heater
- Refrigerant receiver with isolation valve and pressure relief plug (not Sierra)
- PSC condenser fan motor(s) with EC motor option
- Encapsulated high pressure (auto reset) and low pressure (auto reset) controls (adjustable low pressure control is standard on low temperature models)
- Electronic defrost timer with defrost contactor/relay on low temperature models (2 evaps. maximum)
- Electronic air defrost timer (Medium temperature models only)
- UL and cUL listed for indoor or outdoor use

RFH/RFO models include flooded head pressure control as a standard feature.

RVH/RVO models feature the **Sierra™** refrigeration system and no refrigerant receiver .

Sierra™ Refrigeration Condensing Units

The unique design provides built-in refrigerant storage capacity in the condenser section of the condensing unit. They require up to 20% less refrigerant to operate while maintaining continuous peak performance.

Options*

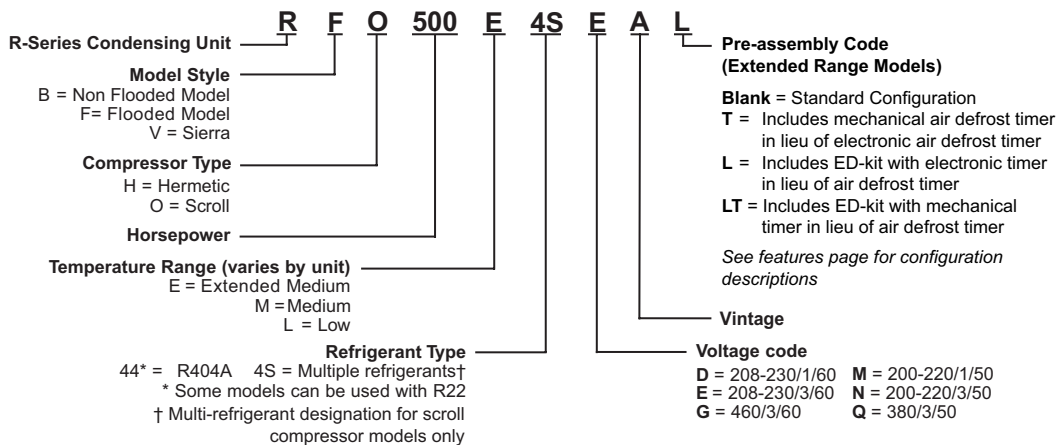

- Suction accumulator
 - Oil separator (may not be available with mounted accumulator)
 - Thru-the-door fused disconnect for cabinet sizes FM2 through FM4
 - External fused or non-fused disconnect - loose or mounted
 - Heated and insulated receiver
 - Oversized receiver
 - Adjustable high/low pressure control
 - Hose option for adjustable pressure control
 - EC condenser motor
 - Pump down toggle switch
 - Liquid line solenoid - loose
 - Phase loss monitor
 - Hail / Snow Guard - loose or mounted
 - Paragon mechanical timer in lieu of electronic timer
 - Timer shipped loose in enclosure
 - CPC timer
 - 316 Stainless steel housing
 - 50 Hz timer and/or defrost kit
- * Not all options are available for Sierra models. See page 4 for details.

1/2 TO 6 HP

MODEL NUMBER NOMENCLATURE

STD = Standard Feature

N/A = Not Available

*Liquid line kit includes: Piping, filter drier, sight glass/moisture indicator.

**Adjustable low pressure control on low temp. models in lieu of fixed control.

+ Sierra units do not include a receiver tank.

^ Standard on extended medium temp. models only.

(1) Electric defrost kit is included on low temp. models and optional for medium temp. models - see pages 17-19.

(2) Sierra models are critical charge units - see pages 3 and 20.

See specification pages 20-21 for compressor horsepower.

* Each asterisk represents a variable character based upon model, refrigerant, voltage, and vintage ordered. See page 4 for nomenclature.

RLA = Rated Load Amps LRA = Locked Rotor Amps MCA = Minimum Circuit Ampacity MOPD = Maximum Overcurrent Protection
MCA includes 1 amp allowance for control circuit requirement.

† Note: Maximum Evap. fan amps and maximum defrost amps are shown to provide ratings when electric defrost is required and is an optional feature. Maximum Amp value used to determine MOPD. Exceeding these values invalidates the listed MOPD and requires a revised calculation. Contact Application Engineering when amp draw requirements deviate from the chart values.

Δ R*H100E4S and R*H125E4S are not available in 200-220V/1/50 Hz.

ΔΔ R*H100E4S, R*H125E4S, R*H150E44, and R*H200E44 are not available in 200-220V/3/50 Hz.

‡ R*H055E4S, R*H080E4S, and R*H090E4S are not available in 208-230V/3/60 Hz.

* Each asterisk represents a variable character based upon model, refrigerant, voltage, and vintage ordered. See page 4 for nomenclature.

[^] Sierra models (RVH/RVO) are critical charge units. They do not require additional refrigerant for winter charge and have no auxiliary receiver tank. Liquid line run is a maximum of 50 feet. Liquid line solenoid must be mounted at case or evaporator.

* Each asterisk represents a variable character based upon model, refrigerant, voltage, and vintage ordered. See page 4 for nomenclature.

† Estimated dBA values at 10 feet from the unit. Correction factors: Deduct 6 dBA for 20 to 40 feet, 12 dBA @ 40 to 60 feet. Ratings at the outlet of the discharge air. The actual measurements may vary depending upon installation variables. Environmental factors may have a significant influence on this data.

†† See pages 22-24 for associated drawings.
