

PRODUCT INFORMATION NOTICE

PIN No: TCO- 41
Date: May 29, 2013
By: Joe Berry
Issue: Dual refrigerant condensing units
Subject: New Uni-Pak product literature

Attached you will find product literature describing ColdZone's latest offering of ½ to 6-½ HP Uni-Pak air cooled condensing units.

Upon examination of the document you will note that all H44, H22 and L22 models, except for *S200L22, have been discontinued. Replacements for the H22 and L22 models are dual rated M44 and L44 condensing units which can employ either R404A or R22 refrigerants. Some models, as noted in the brochure, can also utilize R407C.

To inform the installer of this dual refrigerant capability, a label noting that the unit is a dual refrigerant model is affixed just below the condensing unit data tag.

Uni-Pak publication 502.18 describes the current product offering and is now available for shipment from the literature warehouse. It can be ordered by contacting Sharon Howell at sharon.howell@htpgusa.com or via telephone at 714-627-2230.

ACTION:

Distribute this information to your Reps and customers. Please retain this notice for future reference.
