

# PRODUCT INFORMATION NOTICE

*PIN No:* MKT-25W  
*Date:* February 2, 2011  
*By:* Joe Berry – Marketing Manager  
*Issue:*  
*Subject:* **Wittbox 6.4-32**

This subject software is available for immediate release. This version is compatible with Windows 7 – 32 bit and Microsoft Excel 2010 along with older version of Windows and Excel. It includes January 2011 pricing as well as the newest extended range R404A hermetic condensing unit models. A hyperlink has also been added to the box load report page and the pricing module quote sheet to direct users to the Witt website in order that they might check finished goods inventory or obtain pertinent product literature.

It is the first full release of the version 6.x, all Excel based software for Witt, replacing the series 5.x version that was written in Toolbook. The program is still available in three configurations allowing Sales to control its release within their various territories.

- Wittbox version **NP** contains no pricing module. This basic version of the program is intended for use by contractors and other businesses to assist them in box load sizing and equipment selection. These users would then contact their local refrigeration wholesaler or Witt representative to obtain pricing information. Customers who purchase equipment per a special Net Price agreement would also use this version.
- Wittbox version **NV** includes the pricing module but does not contain WV-Series 20 to 60HP condensing unit pricing. The user may obtain current list prices for smaller G-Series and WD-Series systems, but when selecting the larger condensing units, the user is required to contact the local Witt Representative for pricing, thus allowing the Rep to become involved with the project. This version is intended for most Witt customers.
- Wittbox (no suffix) is the full version of the program and contains list pricing for all systems including WV-Series condensing units. It is primarily intended for use by the Product Applications department, Witt direct sales personnel and Witt Representatives.

This notice announcement coincides with the official release of G-Series Product Bulletin 311.7 containing the latest Proline condensing unit data. See PIN notice TCO-39 for further details regarding these condensing units.

**ACTION:** Save this notice for future reference.
