## QUANTUM AIR™ Remote Air Cooled Condensers

We've raised the bar for condenser design by increasing efficiency and reducing fan noise while making these condensers easier to set up and service. Paint protected galvanized steel housing, ingenious hinged leg and fan panel designs, LED lighted control boxes, high efficiency swept wing fans, and our proprietary floating coil design are all standard features of these innovative air cooled condensers. For more than 70 years, Russell has delivered advancements in commercial refrigeration. Now, we're redefining COOLING.
