

# Perfect Reach-In Refrigeration

Russell ASL models are designed specifically for reach-ins, coolers and freezers -- in both size and BTU capacity -- and are the *only* evaporators perfect for the application, both new OEM designs and replacements.

# Energy/Cost Savings Now In Larger Capacities

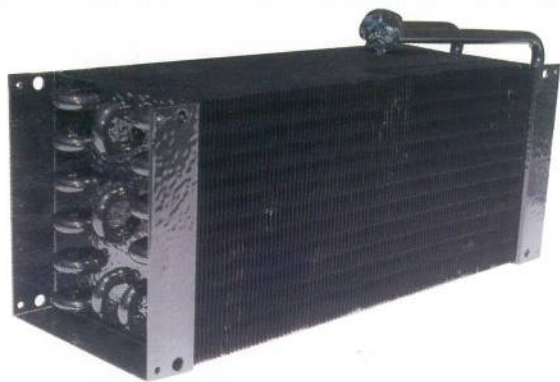

Russell Sierra™ refrigeration systems provide more cooling from less of a refrigerant charge, use less energy. High Sierra™ systems add counterflow rapid defrost. Both are now available in larger designs through 10 HP.

# Better Coated Coils At Better Prices Too!

Coating of refrigeration coils helps them withstand corrosive environments. Russ-Proof™ is a truly great baked-on coating at a competitive price, for acidic fumes (vinegar, etc.), other contaminated environments.

# Refrigeration Electronic Controls: Simple is Best

Simple to use, simple to install, saves energy and operating costs, works with any condensing unit. That's the Russell Navigator™ electronic control system, designed specifically for refrigeration applications.
